PROJECTS

Group Projects

- **Physics Project: Laser Security System**
- Developed a security system using laser light and sensors to detect unauthorized access. Designed the circuit to trigger an alarm when the laser beam was interrupted, ensuring reliable intrusion detection.
- **Li-Fi**
- Implemented a prototype Li-Fi system that transmits data using LED light as a medium. Designed and tested data transfer between devices using light signals, highlighting an energy-efficient and cost-effective alternative to Wi-Fi.
- **PPT and Poster Presentations.**
