SOHAM GAIKWAD

B.Tech Computer Engineering Student | AI/ML Enthusiast

+919967766419 spgaikwad2696@gmail.com

ABOUT ME

Computer Engineering student specializing in AI/ML with hands-on experience developing end-to-end intelligent applications across machine learning, deep learning, NLP and Transformers. Skilled in Python, Java, and AI development workflows, with a focus on building scalable, production-oriented solutions to real-world problems.

EDUCATION

2010 - 2022	**Don Bosco High School**
2022 - 2024	**Kamaladevi Jr College**
2024 - 2028	**Vidyalankar Institute Of Technology**

SKILLS

- Java
- Machine Learning
- Python
- Deep Learning
- Numpy,Pandas
- Natural Language Processing
- DataVisualisation
- Transformers

PROJECTS

- **FactoryMind AI**
  AI-powered digital twin platform for smart factories that monitors industrial processes, predicts equipment issues, and provides intelligent maintenance insights.
  Combines ML, real-time simulation, and agentic AI to enable proactive decision-making and factory optimization.
- **SatQuery AI**
  AI-powered satellite data analysis platform that enables users to query, analyze, and extract insights from satellite imagery using natural language.
  Combines computer vision and AI-driven analysis to simplify geospatial intelligence and remote-sensing workflows.
- **AI Retinal Disease Detector**
  Deep learning-based retinal disease detection system that analyzes retinal fundus images to identify potential ocular abnormalities.
  Integrates Grad-CAM explainability to highlight image regions influencing model predictions and improve clinical interpretability.
- **ScamShield**
  AI-powered scam and fraud detection system designed to identify suspicious messages for jobs, internships etc., links, and online content.
  Uses machine learning and NLP-based analysis to assess risk and provide users with actionable scam warnings.

HACKATHONS:

- Smart India Hackathon
- College TCS Hackathon
- KJ Somaiya Hacktoberfest
